

Cameron ISD

Three Critical Elements of Instruction

The district will establish clear expectations of instruction:

- *The learning objective is evident to the student. Every student, every day understands what they're learning.*
- *Every class, every day, every lesson is at grade level expectations (TEKS).*
- *The teacher provides a variety of appropriate instructional practices, group formats and research based instruction to ensure student achievement.*
- *Every day, in every class, every assignment shows that student work is occurring at a level appropriate to the TEKS taught.*
- *Every day, every class, every student is engaged in meaningful learning.*

The district/school will arrange for teachers to work in teams so that they can meet and exceed expectations.

The district/school will institute simple routines for honestly and continuously monitoring teaching to ensure its effectiveness.
